August 2017 – February 2023

5 years, 6 months

Ingenieur développement fullstack

As a senior dev, I mostly manage the collection platform to get data, processing, wrangling, cleansing. Main collected data are Priips EPT, Mifid EMT, EET, ... As a tech lead, I coordinate teams, draft architecture, and organize stuff with all actors to reach a stable and technically viable solution, matching the target vision. I design and dev most of the patterns like data layers, orchestration, choreography, distributed transactions, communication event driven, business monitoring, contract spec with json schema, code generators for microservices ready to deploy and for API clients, tooling devops scripts for local dev, delivery and troubleshooting. The stack is composed of several layers around these main technologies : - SpringBoot, Camunda BPM, Kafka, Trifacta, Camel, MsSql, Mongo, Elasticsearch, Kubernetes, AKS, ESB, Openshift, React, GraphQL, Nodejs We are working in collaboration with Bourse du Luxembourg architecture team to evolve to a modern solution, cloud-native in Azure. In 5 years, we fully moved from legacy tomcat+mssql+esb to distributed event driven micro services+mongo+kafka cloud native. Since Fundsquare's acquisition by Fe Fundinfo, short target is to move completely cloud native, and integrate their platform.

January 2021 – October 2021

9 months

Senior Software Developer

Part time between LuxSE and Fundsquare (for Sfeir) The goal is to develop a new common set of tools. These services are shared by LuxSE and Fundsquare. Hosted in Azure, relying on Spring - Kafka - Mongo, I'm in charge of the development of several services. FTP connector, API Catalog are the first services of this platform.

REFERENCES

I had the chance to work with Ludovic at the European Parliament for about 2 years. The way he can deliver quality software on a very short time using cutting-edge technologies is very impressive. His experience and ability to foresee problems at the very first phases of the project helped us a lot while taking decisions. I would recommend Ludovic to anyone looking for a highly skilled, effective and professional software engineer.

— Vincent Mellano

Ludovic is a very talented person. He can tackle hard tasks in a short schedule while maintaining the quality of the result. He was an invaluable partner during the time we spent working in the same service of the European parliament, and I can't wait to work with him again in the future years if it is made possible. In the meantime, I can only recommend him to anybody looking for a capable professional, who doesn't lack neither the ability to learn nor an advanced existing technical knowledge.

— Pierre-antoine Gregoire
